### WORK EXPERIENCE

#### Android App developer

Developed Android applications using Java through academic projects and personal hobbies, gaining hands-on experience in mobile development.

#### Full Stack Developer (Freelance)

Built and delivered multiple web and Android applications for freelance clients, managing full-stack development and ensuring each project met the client's needs.

#### Web developer

Developed multiple web-based applications, including all final academic projects, and applied new skills by coding projects while learning, ensuring practical hands-on experience and improved development expertise.

#### Real work Experience

Developed a system connecting business owners with clients as part of a final project, including designing and building "Caleb's Kitchen," an Android food delivery application. Gained hands-on experience in full app development, implementing client-focused solutions and real-world project requirements.
